

Expansion of production capacity and R&D Center

Thai Nisshin Technomic has expanded production capacity at its factory in Samutprakarn for industrial usage pre-mix products. Increased production will start from September. The company also plans to expand its R&D Center in the central Bangkok area for further growth of business in ASEAN areas.

Thai Nisshin Technomic started production in Bangpoo Industrial Estate of Samutprakarn in 1991 and has developed its pre-mix business domestically as well as internationally. The company predicts that future economic growth in ASEAN area will lead to greater demand for highly value added pre-mix for westernized foods in the area. With that in mind, the company determined the production capacity expansion.

Thai Nisshin Technomic also plans to expand its R&D Center at Jasmine City Building in central Bangkok in September 2010. The current R&D Center was built in January 2008, and numerous customers have visited the center for their product development studies. With this expansion of the R&D function, Thai Nisshin Technomic aims to provide customers with better service.
